Durable Aluminum Flame Arrestor for Fuel Tank Vent Piping

HBFA Series of Aluminum Flame Arrestors are typically installed in the middle of the above-ground vent pipe connected to the underground fuel tank. Its function is to prevent external flames from entering equipment or pipelines containing flammable and explosive gases, or to stop the spread of flames between equipment and pipelines. The flame arrestor is also known as a flame filter, flame trap, or fire arrester.

Technique Specification:

Body: Aluminum
Arrestor Material: Foldable Aluminum
Flame Arrestor: Built-in
Diameter: 1 inch to 3 inch
Connection Method: Flange

Ordering Specifications:

Item No.	Diameter Size	Flange Hole Center to Hole Center
HBFA-25	25 mm	85 mm and 4 Holes
HBFA-40	40 mm	110 mm and 4 Holes
HBFA-50	50 mm	125 mm and 4 Holes
HBFA-65	65 mm	145 mm and 4 Holes
HBFA-80	80 mm	160 mm and 4 Holes
