Durable Aluminum Measuring Hole for Underground & Above-ground Fuel Tanks - Level Monitoring & Sampling Port

HBMH Series of Measuring Holes are made in material of cast aluminum. It is a dedicated accessory used to measure the oil level inside the tank, as well as to draw oil samples. Installed on the top of the oil tank, it serves the purpose of measuring the oil level, testing, and sampling. Each oil tank typically has one located near the tank ladder platform. It is equipped with a seal-able hole cover and lockable bolts. To prevent sparks during closure when the hole cover contacts iron, the sealing groove of the hole cover is embedded with an oil-resistant rubber gasket or soft metal (copper or aluminum).

Technique Specification:

Body: Aluminum
 Cap:Aluminum
 Opening Type: Rotary
 Size: DN80 to DN150 (3 to 6 inch)
 Temperature Range:-20~+50℃
 Standard of connecting flange can be produced according to client's detailed requirement.

HBMH Series of Measuring Holes With Rotary Opening Type

Ordering Specifications:

Item No.	Diameter Size	Bolt Hole Center to Center Distance	Opening Type
HBMH-80-150-R	80 mm	150 mm	Rotary
HBMH-80-160-R	80 mm	160 mm	Rotary
HBMH-100-170-R	100 mm	170 mm	Rotary
HBMH-100-180-R	100 mm	180 mm	Rotary
HBMH-150-225-R	150 mm	225 mm	Rotary
HBMH-150-240-R	150 mm	240 mm	Rotary

Technique Specification:

Body: Aluminum
 Cap:Aluminum
 Opening Type: Pedal
 Size: DN80 to DN200 (3 to 8 inch)
 Temperature Range:-20~+50℃
 We are the only manufacturer in worldwide range for this 8 inch measuring hole for some special using.
 Standard of connecting flange can be produced according to client's detailed requirement.

HBMH Series of Measuring Holes With Pedal Opening Type

Ordering Specifications:

Item No.	Diameter Size	Bolt Hole Center to Center Distance	Opening Type
HBMH-80-160-P	80 mm	160 mm	Pedal
HBMH-100-170-P	100 mm	170 mm	Pedal
HBMH-100-180-P	100 mm	180 mm	Pedal
HBMH-150-225-P	150 mm	225 mm	Pedal
HBMH-150-240-P	150 mm	240 mm	Pedal
HBMH-200-280-P	200 mm	280 mm	Pedal
