

## High-Precision High-Flow Fuel Dispenser Meter

DTJ6 flow meter adopts advanced technology, which can be widely used on different gasoline dispensers. This product has advantages as long using term, high precision, firm structure etc. It can be the best choice of gasoline dispenser component.

### Technical specification:

Packing size	280mmx275mmx290mm
Discharge rate of each revolution	1L
Rotary direction of axial	CW
Level	256mm
Vertical	254mm
Flow range	5~160L/min
Working pressure	0.12MPa-0.35MPa
Accuracy	±0.2%(5L/min-100L/min)
Repeat error	≤0.1%
Working life	≥10000000L
