

HRD1120X Series High-Performance Spring Retractable Fuel Rubber Hose Reel

This Series of Spring Retractable Fuel Delivery Hose Reels are equipped with Viton seals, incorporate metal forms and a heavy-duty base to ensure the greatest possible strength and are ideal for mobile and permanent-mount applications. These rugged, corrosion-resistant(stainless steel inlet and outlet pipe connectors are for option) reels are suitable for a wide variety of fuel applications including E85.They are supplied with our Viton O-ring style swivel. NOTE: Not recommended for jet fuel.

Features:

Ideal for mobile and permanent mount applications

Suitable for a wide variety of fuel applications including E85 (not recommended for jet fuel)

Incorporates metal forms to ensure the greatest possible strength

This series of reels can usually wind 20 meters of 1 inch diameter fuel delivery hose. If the size of the inlet and outlet connector is changed to 1 inch, it can wind about 30 meters of 3/4 inch diameter fuel delivery hose. Reel racks of the same size can be adapted to 3/4-inch and 1-inch hoses, increasing product selectivity.

Specifications: Max. Working temperature:65°C

Item No.	Hose	Hose I.D.	Hose O.D.	Hose Length	Max. Pressure	Reel Inlet	Reel Outlet
HRD1120	without				0.3 Mpa	1"	1"
HRD1120J	with	25 mm	37 mm	20 Meters	0.3 Mpa	1"	1"

Note: The ADBLUE urea reel and E85 ethanol gasoline reel are optional. At the same time, it is necessary to replace the inlet and outlet connectors of the reel rack and all pipes in contact with the liquid medium with stainless steel material, and replace the sealing materials with seals resistant to ADBLUE urea reel and E85 alcohol gasoline.
